Easy maintenance of Digital Programmable Wire Coil Winding Machine

APPLICATION:

Typical applications for Digital Programmable Wire Coil Winding Machine with a single wire size, include the manufacture of gas ignition coils, solenoids, relays, motors and many forms of sensor coil in small and medium batch quantities. It is ideal for use in the production of small inductors, particularly bobbins wound with a single wire size and high turns count. The high maximum winding spindle speed (up to 6000 rpm) enables coils with a high turns count to be wound in a short cycle time.
